Shipping Form

How to clean your parts: Please make sure your items are degreased and clean before shipping. Do not send us parts that are dripping with oil. Please clean them with brake cleaner or other types of degreaser. We don't want oils contaminating our blasting media.

What to remove: Make sure there are no bushings, bearings, seals, races, rubber, plastic, valve stems, weights, or labels on your parts. Please remove these items prior to shipment.

Sand Blasting: Most parts require sandblasting and hand sanding prior to powder coating.

Masking: We're familiar with most common areas on automotive and motorcycle parts that require masking before coating. We will automatically mask these surfaces as well as threaded holes with silicon plugs and high temp masking tape. If you have specific requirements, please include a detailed explanation with shipment.

Shipping Charges: Parts will be shipped via UPS ground unless otherwise indicated.
Disclaimer: Powder-Coated.com is not responsible for structural integrity of items due to their age and condition prior to restoration. We will not be held responsible for holes (due to rust) after the sandblasting process, and breakage of bolts and gaskets during the dis-assembly and assembly process.
